

Display & Play Insert Blank

To manually create 8.5" x 5.5" inserts for your Display & Play pockets, simply write, draw, tape or glue whatever information you want on letter-size sheets and cut or fold each page in half. Depending on how you plan to use the inserts, you may position elements on the top half, bottom or even both sides of the sheet. Note that some elements may need to be rotated 180 degrees to work best when sheets are folded over or cut.
